

## Educational Performance Report

	sl_n o	ssc_p	hsc_p	degree_ p	etest_p	mba_p	salary
<b>Mean</b>	108.0	67.303395	66.333163	66.370186	72.100558	62.278186	288655.405405
<b>Median</b>	108.0	67.0	65.0	66.0	71.0	62.0	265000.0
<b>Mode</b>	1	62.0	63.0	65.0	60.0	56.7	300000.0

The mean presents the average marks the students have received through their various educational spaces. In this chart we can clearly see that the performance of the students from 10th grade to a degree has shown a decrease and raised to an above average mark in the entrance and again decreased in MBA.

The median sector also presents data starting from 67.0 ,decreasing in the next two levels and rising in entrance examination and and again a fall in the MBA examination.

The salary difference between the mean and median denotes that there are some outliers .

The mode sector presents the value attained by most students ,beginning from 62.0 then shows a positive rise till degree and falls back negative after that.

We also notice that students perform consistently average to above-average but struggle in MBA programs.

Hence from the data we can derive a conclusion that the average performance of the students fluctuates between average and slightly above average .Therefore eventually leading to the salaries earned by them .
